### Skills

---

- Back-end
  - Java
  - Spring Boot and all your universe
  - Node.js
  - Django
  - Python
  - Ruby (studying)
  - Flutter (studying)
- Front-end
  - JavaScript (ES6) | Type script
  - Angular.js
  - React.js (studying)
  - Vue.js
  - jQuery | CSS3 | HTML5 | Bootstrap
- Database
  - MySQL
  - PostgreSQL
  - SQLServe
  - Mongo (studying)
- Tools
  - Docker
  - AWS
  - Docker compose
  - Github
  - GIT
  - Agile methodology experience

### About Me

---

I specialize in creating efficient software solutions to solve problems and meet customer needs. I have knowledge in several programming languages, such as Java, Python, JavaScript, among others, as well as experience in web development (more than 3 years) and mobile (in learning). In addition, I am very familiar with agile methodologies, which allow me to work collaboratively in a team and deliver projects with speed and great quality.

I have a passion for learning new technologies and I am always aware of industry trends, always looking to update myself to offer the best possible solutions!

### Professional Experience

#### IBM Company | Software Developer

*December 2021 - Present*

Acting as a full stack dev in the development and maintenance of features in the system, as well as in the creation of new aws services (Iambdas, kafkas, sor tables, SQS queue).

Main activities:

- Development of new application features
- Maintenance of existing application features
- Development of new aws services
